ABOUT STEAMULATION

Exclusive. Superior. Ultimate. Pure. Mini.

Steamulation hookahs are developed by Schmidt Innovations in Lohr am Main, Germany. Patented technologies such as the SteamClick system, Moon Gravity and Purge Pro set the standard for draw, sealing and ease of use, and the Ultimate was named Best Hookah 2023 at the Frankfurt Hookah Fair. This catalogue presents the current range: five series of hookahs with their replacement glass, mouthpieces and accessories.

LEAD TIME & ORDERING

Imported to order: by sea or by air.

SEA FREIGHT

45–60 days

AIR FREIGHT

2–4 weeks

From order confirmation to delivery in the Maldives. Tell us how soon you need it and we'll quote the right option.

01

Choose

Pick the hookahs, colours and parts you want from this catalogue.

02

Request a quote

Send us your list; we reply with a quotation in USD or MVR, by sea or air.

03

Confirm

Confirm the quotation and the shipping method, and we place the order.

04

Delivery

Delivered to your venue, with the invoice and signed delivery note by email.

TECHNOLOGY

What makes the difference

01 Moon Gravity

Takes the check-valve balls out of the flow channel and offsets 83% of their weight with a fluidic trick: a 50% better draw in the base, with no loss of tightness.

02 Purge Pro

The most advanced blow-out system for multi-hose hookahs: all four valves work automatically both ways, so anyone can blow out without removing valve balls.

03 SteamClick 360°

The patented click closure (EP3011848): open and close the bowl with one simple hand movement, in a fraction of a second, with maximum stability.

04 Xpansion

The most flexible plug-in closure: twist the cap to fit any standard vase (neck Ø 44.5–47 mm). With SteamClick it forms the Dual Connection System.

05 AirFlow Control

Each hose connection adjusts on its own, continuously from a traditional to a super-light draw, so every guest gets the draw they like.

06 Dip Tube Control

Adjust the dip tube in 10 stages to the bowl size and water level, and smoke with or without the diffuser.

07 Advanced Closed Chamber

The valves sit inside the base station; the balls unscrew through four openings, so there is no limescale build-up and no laborious cleaning.

08 Steamulation Diffuser

Sharp inner edges cut off loose tobacco so the dip tube never blocks, and shaped outlets keep every session very quiet.

FASCINATION. EXCELLENCE. THE ART OF ENGINEERING.

Exclusive

Timeless design at the highest level. Real Swarovski crystals are worked into the base, smoke column and mouthpiece; the body is aerospace aluminium, made in Germany. Golden Aurum and Copper Sunstone glass is refined with real 24-carat gold or pure copper.
